

Raynham Center Water District

Raynham MA 02767

Ph. 508-824-0020 / Fax 508-880-2414

Application for Residential, Commercial and Industrial Subdivisions or Extensions to the existing Water System in an existing town roadway

Date of Application: _____

Proponents Name: _____ Mail Address: _____

City/Town _____ State: _____ Zip Code: _____

Contact Name if different than above: _____ Phone _____

Name of Project and Location: _____

Include a Locus Map or Street Address for the project

The project proponent should review the current rules and regulations of the Raynham Center Water District (RCWD) and as amended. The proponent or their assignee's will be required to adhere to these rules and regulations in perpetuity for both construction and for future water use.

The RCWD supplies water that meets all state and federal laws and guidelines. The RCWD does not guarantee a constant pressure or uninterrupted service. The RCWD also does not guarantee the consumer a particular volume of water or pressure except as required by MA DEP regulations to effectively operate fire sprinkler systems or other appliances, the same being subject to the variable operating conditions that may take place within the water mains of the RCWD.

Should the plans or project scope be changed for any reason after the Boards approval, the proponent will have to refile with the Water District to address these changes.

Project Description: Attach a narrative describing the project, including any special requests that may be required for the project. The project proponent must address any impacts the project may have on the water system, and its existing customers. If the project is to be completed in phases you will need to include a timeline for each phase. The RCWD may at its discretion have a registered engineer review the project to assess any impacts to the existing system. All cost for the review shall be paid by the project proponent.

Project Plans: Must meet all the requirements as contained in the RCWD rules and regulations under section 2.3. A copy of the plan must be included with the application.

Estimated Project Commencement Date: _____

Estimated Project Completion Date: _____

Number of lots/units per lot being proposed: _____

For Commercial or Industrial the Number of Fire Connections being proposed within the subdivision: _____

Fire Flow Test results: Attach the flow test results to the Application

You must confirm that there is ample water flow and pressure to meet your fire protection requirements, or what is proposed to meet the requirements. If there is not ample water flow and pressure, attach a proposal of what you propose to do to offset the shortfall.

All commercial or industrial buildings regardless of use must have a backflow unit at the water meter for the purpose of building containment. Additional backflow devices may be required depending on the activity within the building.

Calculated Total daily domestic water Demand in gallons: _____

Calculated Peak Hour water demand in Gallons per hour: _____

The RCWD discourages the use of automatic lawn irrigation systems connected to the domestic water system. Is there an alternative to a domestic connection for irrigation, well, rainwater collection system, low water use landscapes or similar? _____

In all cases lawn irrigation systems must comply with Section 10 of the RCWD rules and regulations. Lawn irrigation from domestic water will not be allowed in common areas such as roadway medians or other similar common areas.

The Raynham Center Water District may decline to allow an irrigation system to be connected to the system if it does not meet the best water conservation methods available. This includes design, proposed equipment, and system operation.

The proponent also being warned that should the Raynham Center Water District, or the State of Massachusetts, DEP impose outside water use restrictions. If outside water use restrictions are put into place, the water to the irrigation systems must be curtailed according to the restrictions.

The RCWD assumes no liability for conditions that exist within a customer's home, commercial, or industrial buildings plumbing system for any damage caused due to the RCWD shutting off water for the purpose of; repairing pipes, meters, hydrants, or any other work done by the RCWD to maintain the integrity of the water system. Consumers are hereby cautioned to maintain their interior plumbing and provide, at their own expense, any and all suitable valves or safety devices necessary to protect their plumbing, appliances or other equipment that may be affected by such incidents. In any event the RCWD expressly stipulates that it will not be held liable for any damage incurred by such circumstances.

By signing this application, I/We hereby state the following:

1. I/We have read the Raynham Center Water Districts Rules and regulations, dated _____ and understand them.
2. I/We are aware of all the fees contained within the rules and regulations and hereby agree to pay them, along with any special requirements and associated costs required to mitigate issues to existing customers.

3. I/We are aware that any agreements between the Raynham Center Water District and the Project Proponent will carry forward to any future owner(s).
